

THE \$100K MANUAL BOTTLENECK

CORE PROBLEM:

HUMAN-LED 3D AUDITS AND OPENBSD SCENE OPTIMIZATIONS ARE

:SLOW

INCONSISTENT

EXPENSIVE

DEPENDENT ON SENIOR ENGINEERING TIME

THE NUMBER:

40+ HOURS PER MONTH WASTED ON MANUAL VALIDATION

THIS IS THE FRICTION POINT THAT EVERY CTO AND LEAD ENGINEER IMMEDIATELY RECOGNIZES.

THE STRATEGIC QUESTION:

WHY PAY FOR HUMAN TIME WHEN YOU CAN PAY FOR MANUFACTURED INTELLIGENCE

THIS LINE IS POWERFUL BECAUSE IT REFRAMES THE ENTIRE DECISION:

NOT “HIRE ME”

NOT “BUY MY SERVICE”

BUT UPGRADE YOUR INFRASTRUCTURE

THAT’S FOUNDER PSYCHOLOGY.
